

Hamilton Region Bird List

This list was compiled in 2010 from HFNC records and members' experience and it covers an area of ~50 km radius from Hamilton.

The 246 species in this list are grouped as **Water Birds**, **Birds of Prey**, **Other Native Species** and **Introduced species**. The nomenclature of Christidis and Boles (2008) has been used.

Given the appropriate habitat and season, the likelihood of seeing a particular species may be gauged from the **Status** column (**S**):

C = common, **M** = moderately common, **U** = uncommon, **R** = rare, **V** = vagrant, **E** = escapee.
