

2012-04-HFNC-activities-events

Hi everyone

This is a reminder that the HFNC excursion on Sunday 22 April is to the **Bear State Forest** area (north of East-West Rd at Mooralla). We will be setting up 10 remotely triggered cameras to capture images of wildlife (hopefully any small mammals) and also installing 10 fauna nest boxes (in an arrangement of 5 pairs), hopefully to help detect Brush-tailed Phascogales and Sugar Gliders (maybe *Antechinus* spp. also).

We leave from Hamilton Visitor centre at 9 am Sunday and will probably enter the Bear SF via Hallams Rd (off East-West Rd), leading NW. If you can only come late you will probably find us there, or a sign telling you where to go. All welcome - this should be an interesting (and different) project.

For those who could not attend the Club Meeting on Thursday 19 April, the **HFNC website** is now running, although still with quite a lot to add on the Publications/Information page.

<https://www.hamilton-field-naturalists-club-victoria.org.au>

Check out the site to date - and enjoy the bandicoot cartoons that Ken Grimes has provided.

Cheers

Rod Bird
