

Indigenous Vascular Flora of the Wannon River Frontages from Wannon Falls Scenic Reserve to the Red Rd Bridge

**Species lists for 44 sections of Wannon River frontage and
nearby reserves**

Rod Bird

October 2018

NOTE

This is an updated account of the report published in February 2011, adding new records for several sections.

This report lists genera and species, together with associated common names. It does not contain the family listing or the 25 colour photographs of various key species that accompanied the 2011 text.

There have been many revisions of species and genus names over the last 20 years and attention has been given to updating with the latest botanic names listed in the Victorian Royal Botanic Gardens website *VicFlora*.

Some names will no doubt be altered in future years, as botanists subject certain species to further study. Care is therefore required in using this resource.

INDIGENOUS FLORA OF THE WANNON RIVER FRONTAGE AND RESERVES (Wannon Falls Reserve to Red Rd Bridge)

This report summarises surveys from 1975-1985, with additions in later years on Crown reserves (entries from 1986-1995, #; 1996-2005, \$; 2006-2010, Δ; 2011-2015, ■; 2016-2020, ♠) for 44 areas of bushland along the Wannon, together with a flora list prepared for the "Wannon 18 Acre Reserve" by MG Corrick and the HFNC in 1968-69. Cliff Beauglehole assisted with surveys of W1-2, S4, T1-7, F2, F4, J1, J3, J5 & R1-4 (Feb. 1978).

Early surveys (1975-78) were conducted in preparation for the Land Conservation Council's assessment of the conservation significance, future status and management of Crown lands in the South-Western Area District 2 (1979, 1981, 1982). Some of the frontage areas surveyed are private land, held under very old titles. The list of flora for this freehold frontage is the least complete; further surveys will also reveal other species on the Crown frontage.

The objective of this report is to aid the preservation of the landscape, flora and wildlife of this unique 30 km river corridor. Notable plants include *Glycine latrobeana* (Clover Glycine), *Gahnia clarkei* (Tall saw-sedge), *Dicksonia antarctica* (Soft Tree-fern), *Dodonaea cuneata* (Wedge-leaved Hop-bush), *Bossiaea riparia* (River Bossiaea), *Dilwynnia cinerascens* (Grey Parrot-pea), *Pultenea dentata* (River Bush-pea) and rare outliers from the Wimmera in *Aristida ramosa* (Cane Wire-grass), *Triodia scariosa* (Porcupine grass), *Pimelea stricta* (Gaunt Rice-flower), *Myoporum petiolatum* (Sticky Boobialla) & *Philotheca angustifolia* var. *angustifolia* (Small-leaved Wax-flower).

WANNON RIVER FLORA SURVEY

1975-1991

R.R. Bird

Indigenous Vascular Flora of the Wannon River Frontages and Wannon Flora Reserve

(Wannon Falls Scenic Reserve to Red Rd Bridge)

Surveys by Rod Bird & Cliff Beauglehole from 1975-1985

with further records from 1986-95 (#), 1996-05 (\$), 2006-10 (Δ) & 2011-2015 (▣)

and HFNC records for Wannon Flora Reserve, 1958-1968

**Rod Bird
21 Collins St, Hamilton, Vic 3300**

This report provides an alphabetical listing of plants by Genus, then Species & Common Name

File updated in October 2018, with RBG taxonomy updates employed – 381 species recorded to October 2017

Surveys 1959-1965 = all records for W3 area (18-acre Reserve = Wannon Flora Reserve) except those marked #, \$, Δ, ▣

Surveys 1975-1978 of Wannon River frontages (i.e. not including W3) are all records except those marked #, \$, Δ, ▣

Surveys # = incidental new records for years 1986-1995

Surveys \$ = incidental new records for years 1996-2005

Surveys Δ = incidental new records from 2006-2010

Surveys ▣ = incidental new records from 2011-2015

Surveys ♣ = incidental new records from 2015-2020
