Nigretta Falls on the Wannon River in flood
(August 1978)

The Nigretta Falls Crown Land comprises an 8-ha Scenic Reserve (with 105 native species) on the southern side and 12-ha Flora Reserve (with 202 native species) on the opposite side. Collectively, the reserves contained 210 indigenous native species in 2016.

The 25 photographs in the Appendix show the scenic waterfalls and rapids on the Wannon and many of the notable species that occur on the Wannon River Reserves and Crown Land frontages. The photos are by the author.

This report contains entries for species recorded in the reserves since the original paper was published in February 2011. The present revised edition has been posted on the Hamilton Field Naturalists Club website but not published elsewhere.

INDIGENOUS FLORA OF THE WANNON RIVER FRONTAGE AND RESERVES (Wannon Falls Reserve to Red Rd Bridge)

This report summarises surveys from 1975-1985, with additions in later years on Crown reserves (entries from 1986-1995, #; 1996-2005, \$; 2006-2010, Δ; 2011-2015, ▣) for 45 areas of bushland along the Wannon, together with a flora list prepared for the "Wannon 18 Acre Reserve" by MG Corrick and the HFNC in 1968-69. Cliff Beauglehole assisted with surveys of W1-2, S4, T1-7, F2, F4, J1, J3, J5 & R1-4 (Feb. 1978).

Early surveys (1975-78) were conducted in preparation for the Land Conservation Council's assessment of the conservation significance, future status and management of Crown lands in the South-Western Area District 2 (1979, 1981, 1982). Some of the frontage areas surveyed are private land, held under very old titles. The list of flora for this freehold frontage is the least complete; further surveys will also reveal other species on the Crown frontage.

The objective of this report is to aid the preservation of the landscape, flora and wildlife of this unique 30 km river corridor. Notable plants include *Glycine latrobeana* (Clover Glycine), *Gahnia clarkei* (Tall saw-sedge), *Dicksonia antarctica* (Soft Tree-fern), *Dodonaea cuneata* (Wedge-leaved Hop-bush), *Bossiaea riparia* (River Bossiaea), *Dilwynnia cinerascens* (Grey Parrot-pea), *Pultenea dentata* (River Bush-pea) and rare outliers from the Wimmera in *Aristida ramosa* (Cane Wire-grass), *Triodia bunicola* (Porcupine grass), *Pimelia stricta* (Gaunt Rice-flower), *Myoporum viscosum* (Sticky Boobialla) & *Philotheca angustifolius* var. *angustifolius* (Small-leaved Wax-flower).

The flora are listed in a database, with sites indicated as follows:

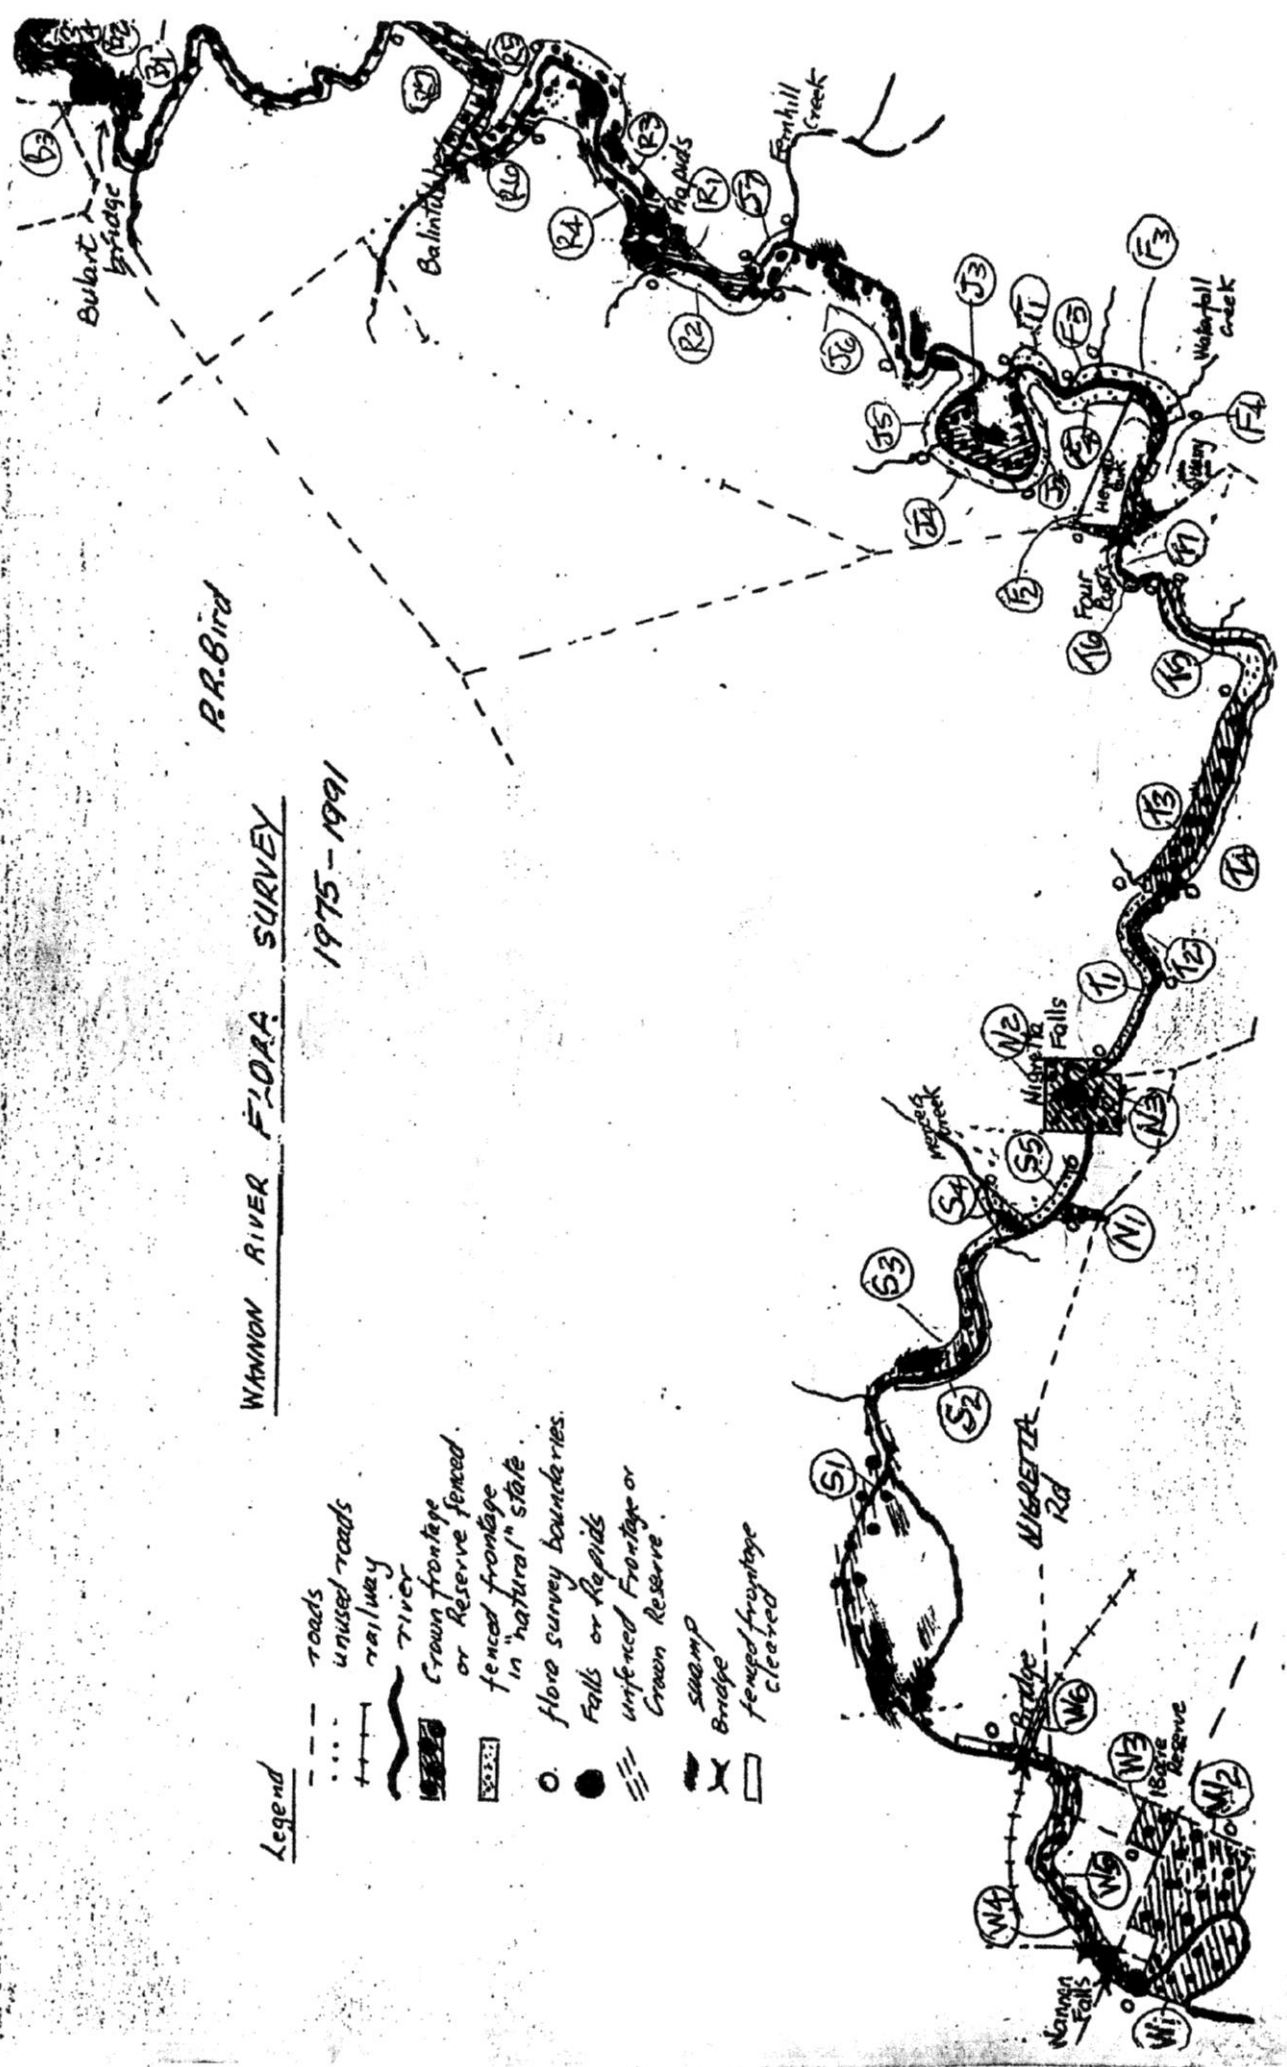

W1...Wannon Falls Scenic Reserve (including Crown frontage), west bank below the Falls
